
ROOF TOP STRUCTURES – Antenna and Dish mounts

6M NON-PENETRATING

Jaggard Wireless offer a range of roof top structure solutions designed to maximise your network coverage and minimise your costs.

PRODUCT DESCRIPTION

- **Non-Penetrating -**

Available in **3m** or **6m** heights these antenna mounts require no invasive fastening into roofs or parapets instead utilising ballast blocks for stability.

- **Wall Mounted -**

Also available in **3m** or **6m** height these mounts are ideal for congested or small area sites where space is at a premium. Suitable for mounting on walls, parapets, and building faces.

All of the above configurations are of welded steel fabrication and are fully galvanised thus ensuring a product that will last.

PRODUCT BENEFITS

- **Economical** – With a low initial expenditure, minimal installation time and negligible maintenance requirements the non-penetrating and wall mounted
- **Rapid installation** – The simplicity of the structures and the minimal number of parts ensures easy installation.
- **Reduced footprint** – Ideally suited for sites with limited real-estate - especially on already congested sites.

- **Re-usable** – The structures are easily dismantled and made ready for re-deployment elsewhere.
- **Aesthetically** agreeable.

ANTENNA LOADING

POLE TYPE	POLE HEIGHT	QTY/GSM Antennas	QTY/MW Dishes
Wall Mounted	3m	2	1 x 300mm
	6m	2	1 x 600mm
Non-Penetrating	3m	2	1 x 1200mm
	6m	4	2 x 1200mm

NOTE- These figures are representative only. Different antennas will have varying weights and wind loads.

SPECIALISED STRUCTURES

With a full complement of design capabilities, structural engineers, draughting office and localised fabricating facilities-Jaggard are able to provide comprehensive solutions to all bespoke antenna mounting requirements.

Specialised structures are particularly useful where multiple and/or oversized antennas requiring mounting.

OTHER SERVICES -

- **RF Transparent screening-**

Jaggard Wireless is able to offer various screening materials designed to both protect and disguise your antenna. Utilising RF transparent products we can help prolong the life of your equipment whilst maintaining the aesthetic integrity of the building/site location.

Installation of Screening

- **Installation and Maintenance services-**

Jaggard's experienced riggers are available to undertake full installation and subsequent maintenance programs to your requirements.
